

JOY M

Self-Ordering Kiosk

JOY M is a modular device designed for self-ordering. Boosts sales in quick service restaurants (QSRs), cinemas, theaters, hotels and many other businesses.

JOY M is the result of the hard work of our specialists, who have carefully analyzed the challenges faced by industries whose business model is based on the sale of standardized products.

Our solutions are developed in cooperation with global technology leaders and respond to the needs of our customers and business partners. This makes the ordering and payment process easy and intuitive.

Touchscreen

Large display

Antiglare screen coating

JOY M

Advantages and benefits

Boosts sales
